

Establishment of VME-CAMAC data acquisition system

by Itakura, Akiyosi; Sugiyama, Akihiko; Nakashima, Yousuke; Mase, Atsushi (Tsukuba Univ., Ibaraki (Japan). Plasma Research Center); Yokomine, Makoto

[en] A CAMAC serial highway is configured and controlled via the VME bus by UNIX workstation. CAMAC commands are executed sequentially ordered by sequence list edited by windows system. Q-repeat mode for block transfer is supported, so the maximum clock rate of 5 MHz for optical link of serial highway is realized. (author)
